Lets say I have a string like this "ABCDEFGHIJKLMNOPQRSTUVWXYZ". I want to find if the first occurrence of this "J"

is before the first occurrence of this "P" then make the next 5 chars of the string (JKLMNOPQR) and then the same for the next "P". How to do it in C#? Thanks. A: Instead of creating a huge static dictionary of all the possible first letters and then going through one by one, I'd just use an OrderedEnumerator and just compare the previous item to the one you're checking against:

```
using System; using
System.Collections.Generic; using
System.Linq; namespace ConsoleApplication1
{ class Program { static void Main(string[]
args) { string s =
"ABCDEFGHIJKLMNOPQRSTUVWXYZ";
var enumerator = s .Select((c, i) => new {
character = c, index = i })
```

The dictionary definition of aphorism, as that of a short sentence or proverbial saying, is "the art of fitting words together" for the purposes of persuasion. A good example is: "If you're looking to make a man a hero, start where he feels most threatened." Aphorisms are usually pertinent (but not always), and therefore can be useful.

Aphorisms are also likely to pierce right through the bullshit. How do aphorisms work?

1. Entrench themselves in your thinking.
2. Simplify and polarise complex issues.
3. Speak to your own situation and how you want to react.
4. Push your boundaries.

In the first video, I talked about the admittedly simple aphorism from Dr. Jordan Peterson "It is the great context in which all else is measured." As it happens, the aphorism was originally created to counter some ludicrous claims made by an American college professor in his student's introductory, pro-feminist class. This professor argued that, by natural law, men had a need for women's bodies, because it made them feel better. (This was presented as some kind of revolutionary idea.) The professor himself was not immune to the aphorism's power. Shortly afterwards he wrote a book in which he admitted that he had had an "epiphany." It was

a big, fat, I mean "epiphany" though. So I asked him what, specifically, the aphorism had meant to him. He said that he had felt compelled to write a book, in which
